

The Hour of Code started as a way of helping children and adults understand what computer coding is. Since its launch, it has helped to inspire more and more people to learn how to code themselves, an essential skill in this digital age! The website has a huge variety of tutorials and activities for children to take part in, each one helping the children learn in small, manageable steps.

There are so many different activities for children to try, you're bound to find one they'll love! You can program for Minecraft, Star Wars, Disney and so much more.

I programmed R2D2 to help the Rebel Alliance! Give it a try:
